

In-Panel Skylight Kit

Architects and homeowners alike know that internal lighting has a profound effect on the perceived mood of a home. Natural light lifts spirits, makes spaces appear larger, and reveals the world in its true color. Beyond the aesthetic appeal, light also reduces eyestrain, increases productivity, and lessens electrical demand, giving you the benefits of natural daylight without the harsh effects of direct sunlight.

Now, Elite Aluminum Corporation makes it easy and affordable for you to enjoy more sunlight in your home. Using an Elite in-panel skylight kit, you can easily and economically install a skylight in virtually any room. The Elite skylight panel replaces one or more roof panels to become an integral part of the roof system. The skylight is 24" x 48" and creates a finished skylight opening of approximately 18" x 42".

Elite's in-panel skylights are double domed and made from durable polycarbonate sheet, a highly impact resistant material with maximum service life, and thermally broken extruded channels for energy

Design with light.
Enhance your living space.

efficiency and strength. The skylight is bonded and sealed to the extruded channel and panel skin with a strong, long lasting industrial adhesive, forming a permanent seal to give you years of worry-free

FEATURES & BENEFITS OF IN-PANEL SKYLIGHTS

- One piece, maintenance free design
- UV stabilized
- Resists temperature extremes
- Durable double dome polycarbonate construction
- High impact resistance – more than glass
- Enhanced thermal protection
- Minimal installation required

Kit includes:

- > Framed and sealed panel opening
- > Double domed polycarbonate skylight (boxed)
- > Application kit (to attach & seal skylight)
- > Installation instructions
